Features

The warmth and luxury of cedar timber is beautifully expressed in these quality built venetians. The elegance of these plantation grown timber blinds is created in a wide range of shades in both the easily cleaned UV resistant lacquered finishes and the traditional oiled finishes. Cedar is well known for its inherent stability, as well as its great insulating properties. You will have many years of enjoyment from these beautiful and practical window treatments.

Operation

Adjust the angle of the blades to achieve the desired light control or privacy by simply pulling the cord operated tilting mechanism. Alternatively lift the blind by pulling the lifting cords and locking the blind into the required position.

Safety

Breakaway tassels ensure these blinds conform to Australian Safety Standards.
