CHANGING YOUR WINDOW OUTLOOK

The Roman Collection CHA

THE ISLANDER Roman Blind

The Islander Roman Blind.

Choose from a wide range of fashion colours in both light filtering fabrics to enhance any décor.

The genuine cedar battens are arched to soften their appearance. For a contemporary finish to any window, they are fitted to both sides to provide strength when raising the blind.

The use of stainless steel staples in the assembly of the blind ensures there are no rust spots caused by natural moisture and with correct installation provides excellent insulation in the colder months and complete privacy when closed. The natural colour variation of the cedar battens is further enhanced by the use of a UV stabilized clear lacquer, giving added life to the timber.

The standard flat fascia provides a more formal look for your entrance.

ENHANCING YOUR WINDOW OUTLOOK

THE SAILCLOTH Roman Blind

The Sailcloth Roman Blind.

27 fashion colours to enable you endless versatility with your decorating. The Sailcloth Roman Blind is a more casual style of blind for the less formal areas of your home and still provides excellent insulation and complete privacy. Available with the option of a heavy duty cord lock or chain operation for ease of use and to remove the unsightly cords while your blinds are raised. Some fabrics are available as roller blinds. Check your swatch for details. The Noosa coloured blockout fabric and the Sienna light filtering fabrics are treated with the latest Dupont Teflon stain release.

SUNSHADOW Screen Romans

Sunshadow Screen Romans.

Reflects up to 80% of the UV rays to protect your valued furnishings.

Sunshadow Screen Romans retain the view you love so much whilst enabling you to keep an eye on the children outside. The aluminium bottom rail, with its clean lines adds to the contemporary appearance of your home.

Sunshadow is also available with cord locks, chain operation and the further option of motorization with remote control.

The full range of Sunshadow fabrics are available in roller blinds for your kitchen window or any area not suitable for a roman blind.

Choose the fabric and colour to suit you, darker colours are easier to see through and reduce glare the most while the lighter colours are harder to see through but reflect the most heat.
