

Stratus

25mm Slimline Venetians

Stratus

25mm Slimline Venetians

Slat Colours

A wide selection of colours are available

Tilt Safe Wand

TILT SAFE Operation

Stratus gives the option of the traditional tilting wand operation coupled with a separate lifting cord or you can select the "Tilt Safe" system.

"Tilt Safe" features a wand tilt operation which combines with the lifting cord running through the wand.

The advantage of this system is that no cords are exposed when the blind is down, thus eliminating the risk of anyone being entangled in the cord.

Color Range

The color range for Stratus has been selected to cater for all decor fashions and design. Covering the whole color spectrum and including a range of metallic finishes, Stratus offers an excellent palette from which to make your selection.

Headbox

The 25mm square Headbox is designed to suit both the standard manual operation and allows for the option of motorization when desired.

Safety

All Stratus Slimline Venetians are fitted with safety tassels to conform to Australian Safety Standards.
